Education

T.C. Gazi University, Computer Engineering

09.2019 – 06.2025

Note: I froze my university enrollment for two semesters.

Experiences

Front-End Development Engineer, SmartICT IT Inc.

09.2025 – 09.2025

- Participated in debugging and testing processes using Git for version control and team collaboration.
- Gained experience in software architecture by developing projects collaboratively with the team.
- Developed interactive frontend applications communicating with RESTful APIs.

Flutter Development Engineer, FLO Retailing Inc.

08.2024 – 08.2024

- Designed and developed responsive, mobile-friendly user interfaces using Dart and Flutter.
- Implemented real-time data management and user authentication.
- Optimized application performance through efficient state management.

Projects

Firebase-Based Social Media Application

- Enabled data synchronization using Firebase Authentication, Firestore, and Realtime Database.
- Automated backend operations with Cloud Functions and integrated notifications via FCM.

Mental Health Application with Flutter

- Built a robust backend and secure data storage using Node.js and PostgreSQL.
- Applied Clean Architecture to ensure modularity and maintainability of the application.

Skills

Languages

- Dart
- JavaScript
- Swift

Principles

- OOP
- SOLID
- Design Patterns

Technical Knowledge

- Algorithms
- Software Architecture
- Data Structures

Personal Skills

- Teamwork
- Analytical Thinking
- Responsibility

Certificate

- Google Project Management – Google

Language

- English – B2

Volunteering

- Gazi Business Life Community – Education Coordinator

Interest

- Reading articles about technology.
